# CHAN NEL LOCK

... pliers

Channellock Self-Gripping Pliers incorporate the new revolutionary, powerful gripping, Channellock design providing a quick, positive grip when pressure is applied to only one handle. The greater the pressure, the tighter the grip. The exclusive tongue and groove Channellock joint makes a plier far superior to the conventional

type of adjustable plier for these reasons:— Greater Strength, Longer Wearing, Closely Spaced Adjustments, Self Cleaning, Visible Adjustment, No wear on Joint Bolt. They are forged from high grade steel, and properly heat treated. Each plier is tested far beyond its intended capacity.
